LISTED BELOW

SUPPLEMENT TO 25X1A
REPORT NO. [REDACTED]

25X1X.

1. The airfield is approximately 5 km east of Tallinn (59°02'N/24°45'E), Estonian S.S.R., just south of the road to Narva (59°23'N/28°12'E). South of the field was the main railroad line to Narva, from which a spur track led to the field. The airport had a concrete runway, approximately 30 meters wide and at least 2½ km long, which paralleled the road.
2. The installations and buildings at the field included:
 - a. Five large hangars, each approximately 25 x 60 meters, permanent buildings with corrugated sheet metal roofs.
 - b. Six permanent two-story buildings, each 20 x 30 or 40 meters, probably billets and administration buildings.
 - c. A flight control station, approximately 20 x 40 meters.
 - d. A radio installation with three masts, approximately 25 meters high, interconnected by wires. Each of the three wires had a lead-in to a small hut, approximately 5 x 8 meters, in the center of the triangle formed by the three masts.
3. About 8 to 10 aircraft revetments, each approximately 10 x 30 meters, were on the northern edge of the field. The revetments had brick walls and flat roofs. Aircraft parking sites which were not specially marked were on both sides of the two hangars on the western edge of the field.
4. The field was occupied by a total of 60 to 80 single-engine fighters and twin-engine bombers.
